GIVING BLOOD HELPS YOUR COMMUNITY.

Lee Memorial Blood Center does not export blood. All blood donated stays to help the patients within Lee Memorial Health System, which includes the only Trauma Center within a 5-county radius, the Children's Hospital and the Regional Cancer Center.

500+ pints are needed each week to treat our patients!

- **NEW** - There is now only a one-year waiting period (from last treatment) for most cancers including breast, prostate and melanoma.

- You can donate if you've had a tattoo in the last year as long as it was done in a licensed facility and it has healed.

- Once anemic, always anemic is not necessarily true. Iron levels can fluctuate; so allow us to check it for you.

- There are many medications that you can be taking and still donate blood, such as: hormone therapy, blood pressure, cholesterol, anti-depressants, birth control, thyroid, diabetic meds, etc.

- Being out of the country does not automatically disqualify you from donating. It depends where, how long and when you traveled, so please give us a call or ask the technician on the blood-mobile.

Requirements for donating blood:

- Weigh at least 115 lbs
- Be at least 16 years old (16 requires parental written consent)
- Be relatively healthy

Have 56 days between donations
Eat a meal before donating blood and be sure to drink plenty of fluids before and after donation.

All donors receive a Free Blood Center Gift
For donation information call 343-2333
